## SunPower® Solar Panels Powering Three Solar Carports in Grenoble

LA-TOUR-DE-SALVAGNY, France, Feb. 12, 2018 /PRNewswire/ -- SunPower (NASDAQ:SPWR) announced today that 750 kilowatts of high efficiency SunPower® E-Series solar panels are powering three new carports in Grenoble. The project was led by regional utility GEG, in coordination with OSER and Grenoble Alpes Metropole, as part of its PARKOSOL program. PARKOSOL develops solar carport projects to serve the greater Grenoble area.

"Solar carports make sense because they provide electricity as well as shade," said GEG Production Director Daniel Besson. "High efficiency SunPower solar panels were the best choice for our carports because they maximize electricity output in space-constrained areas, and are recognized for high performance and reliability. The panels are manufactured sustainably, which enables these projects to meet environmental standards set by CRE, France's energy regulatory commission."

"Compared to conventional panels, SunPower E-Series solar panels produce 45 percent more energy in the same space over 25 years, and offer the solar industry's best warranty, guaranteeing power and product quality for 25 years," said SunPower Executive Vice President Peter Aschenbrenner. "SunPower is proud to partner with GEG on its innovative PARKOSOL program, promoting the increased use of cost-competitive, emission-free solar power in the Grenoble area."

SunPower's direct current E-Series solar panels, as well as its X-Series solar panels, are *Cradle to Cradle Certified™ Silver*. SunPower is the first solar panel manufacturer in the world to achieve this designation, which demonstrates a product's quality based on rankings in five categories: material health, material reutilization, renewable energy use, water stewardship, and social fairness.

SunPower is a majority-owned subsidiary of Total SA.

### About SunPower

As one of the world's most innovative and sustainable energy companies, SunPower Corporation (NASDAQ:SPWR) provides a diverse group of customers with complete solar solutions and services. Residential customers, businesses, governments, schools and utilities around the globe rely on SunPower's more than 30 years of proven experience. From the first flip of the switch, SunPower delivers maximum value and superb performance throughout the long life of every solar system. Headquartered in Silicon Valley, SunPower has dedicated, customer-focused employees in Africa, Asia, Australia, Europe, North and South America.
